Requirements for low turn to gain speed in landing is **500** logged jumps and acquired skills training.

Flight-patterns: The general flight-pattern used at Swedish DZs are a left hand pattern.

Canopy flying

It is every jumper's responsibility to make certain that they don't represent a danger to themselves or to others while under canopy. Everyone must be alert and fly his or her canopies in a way that everyone understands. All jumpers should maintain clear vertical and horizontal separation until they land. Don't spiral down past other jumpers or do S-turns when landing

DZ authorities

All Swedish clubs has a "CI" chief Instructor. Who has the overall responsibility for the DZs skydiving activity. Contact information regarding this person is generally found at the manifest.

At all times when there is skydiving activity, there is a jumpleader (HL in swedish) present at location.

The jumpleader runs the daily activity and whatever that person has to say about the ongoing activity is to be considered as the law.

Insurance policy

All Swedish license holders are granted worldwide insurance cover, including accident and liability insurance, in accordance with the policy held in the association's office.

All foreign license holders are included in the Swedish parachute association's liability insurance policy, while skydiving according to set regulations within the affiliates of the Swedish parachute association in Sweden.

Local restrictions or add-ons

Thus Swedish clubs are located around the country there might be differences in local restrictions, although this waiver is considered as a need to know document.

Please contact a local instructor to gain updates on current local rules and landing areas etc.

Finally

Blue skies and welcome to Swedish skydiving.
